

DGFB

DOOR GRILLE | VENTILATION

LOUVRE FREE AIR: 80% MINIMUM

PRODUCT DESCRIPTION

The DGFB is our goor grille with the greatest air flow. This is due to its construction of flat bars of extruded aluminium.

MATERIAL

STANDARD - High quality Australian aluminium

OPTIONAL - High quality Australian steel, vermin/bird mesh

DBFG grilles are available in 32mm or 40mm thicknesses

FINISH

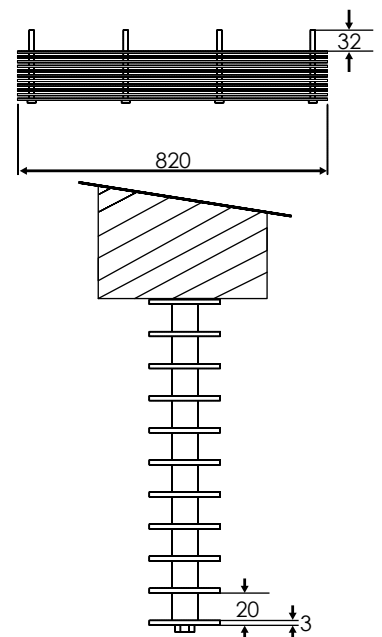

STANDARD - Natural anodised

OPTIONAL - Coloured anodised or powdercoat

INSTALLATION

DGFB grilles are typically installed at the bottom of timber doors. The threaded rods are embedded securely into the timber. As such other types of doors, like aluminum and steel, must have an additional block of timber or the like to allow install.
